

SKOGSEIDVATNET

Fishing chart · Bjørnafjorden · NVE lake 2043 · 5.26 km² · deepest 115–129 m · mean 44 m

DEPTH (M)	SYMBOLS
0–10 m	20 m contour
10–20 m	10 m contour (interpolated)
20–40 m	Fish farm pen, 100 m no-go zone
40–60 m	River / stream
60–80 m	
80+ m	

SPOTS

- 1

Orraelva inflow Top of the long northeast arm, 0–40 m deep. Trout feed where the river comes in, especially in spring and after rain. The river itself is closed to fishing.
- 2

North pens Pens II and III next to the Eidselva inflow. Spilled feed draws big char and trout. Fish the drift side, outside the 100 m zone.
- 3

Ospenes pen East shore pen. Same feed effect as spot 2.
- 4

Underwater hill Top about 52 m, roughly 30 m above the bottom around it. Jig or troll deep along the slopes for char.
- 5

Deepest basin 115 m on the 1983 map; NIVA measured 129 m by sonar. Below 20 m the water stays near 4 °C.
- 6

Island shelves Shallow shelves (0–20 m) around the islands. Trout cruise here in spring and autumn: spinners, wobblers, flies.
- 7

Skogseidelva inflow The 2021 survey found a high density of trout in Skogseidelva. Try the mouth and the drop-off outside it.
- 8

South pen Pen at the south tip, near the Tomraelva inflow. Same feed effect as spot 2.

FISH	WATER
- Brown trout, Arctic char and escaped farmed salmon. A 2020–21 net survey caught 411 trout, 21 char and 17 salmon. - Norwegian record char: 8.285 kg (2002). A 6 kg char was taken through the ice at 20 m in March 2018, on a black and yellow spoon with maggot. - Reported for big char: 100 mm Dividal spoons with UV, maggot or PowerBait, sinking fly lines. Fish near the pens.	- Summer and autumn: warm top layer down to 15–20 m, then a sharp drop to about 4 °C to the bottom. Char often hold just below that drop. - Oxygen is good all the way down. Visibility about 6 m. - The lake drains west to Henangervatnet.

RULES

- Fishing card on [inatur.no](#) (Hålandsdalen Grunneigarlag). Report your catch.
- Keep at least 100 m from the pens. Max 6 hp. Wear life vests.
- Release trout over 3 kg. Keep big char.
- Sources disagree on daily quota, minimum size and net fishing. Check before you go.
